

BRISA™ BOND

GEL BONDING AGENT

WHAT IT IS

A bonding agent that helps adhere **BRISA™** Gel enhancements.

WHAT IT DOES

Forms a powerful covalent bond between gel enhancements and the natural nail for superior adhesion.

WHY YOU NEED IT

- Advanced technology provides superior adhesion.
 - To prevent lifting.
 - To promote longer wear.

FEATURED INGREDIENTS & BENEFITS

Alcohol Denat.:

Solvent used to dissolve or blend together ingredients. Also used as an antiseptic and astringent.

Ethyl Trimethylbenzoyl Phenylphosphinate:

Activates the curing process. Absorbs light energy and uses it to promote monomers and oligomers joining together to create a gel enhancement.

DIRECTIONS FOR USE

- Perform P.R.E.P. and ensure the nail is thoroughly cleansed and prepared.
- Dip brush into bottle; press against the edge of the bottle to drain. Avoid touching brush to table towel.
- Apply a thorough and even layer to one nail, re-dipping brush between nails to assure proper adhesion.
- Apply onto the nail plate up to the cuticle area. Avoid touching the skin or flooding the eponychium and sidewall areas.
- Apply to all five fingers of one hand, cure for 10 seconds in the **CND™** LED or UV Lamp and proceed with product application.
- Do not apply **BRISA™** Bond to tips or existing product.
- Periodically check **BRISA™** Bond to ensure there are no contaminants in the bottle that could impede adhesion.
- Visit cnd.com for complete Step-by-Step instructions.
