

MOXIE™ SCULPTING LIQUID

WHAT IT IS

A cross-linking, fast-set sculpting liquid.

WHAT IT DOES

- Sets up to 50% faster than traditional sculpting liquids.
- Creates lock-down adhesion by forming covalent bonds to the natural nail, making primer optional.

WHY YOU NEED IT

- Reduces application and cure time, even in cold environments.
- Provides enhanced durability and color stability over other fast-set liquids.
- Delivers competition color and speed with real-world wearability.

FEATURED INGREDIENTS & BENEFITS

Ethyl Methacrylate:

An important monomer used in most artificial nail liquids. Despite its strong and distinctive odor, this monomer has twice been determined to be “safe as used by Nail Professionals” according to the Cosmetic Ingredient Review expert panel (CIR) (1995, 2002).

Hydroxyethyl Methyltolylamine:

A catalyst in the liquid monomer that activates the benzoyl peroxide initiator in the polymer powder.

Drometrizole:

Added to prevent discoloration and breakdown of nail enhancements, polish, top coats, and treatments. Also used to stabilize the color of cosmetic formulations.

Isostearyl Isononanoate:

Increases the strength and flexibility of enhancements.

DIRECTIONS FOR USE

- Perform a manicure and ensure that the natural nail is thoroughly cleansed and prepared.
- Apply primer if desired.
- Sculpt the nail in 3 zones using a medium mix ratio (1.5 parts liquid to 1 part powder).
- Shape and refine using CND files and buffers.

CND offers comprehensive education opportunities. Check the education section of cnd.com for a course near you.

CREATIVE SUGGESTIONS

- Set time makes it ideal for sculpting “moons” and 3-D nail art.

INGREDIENT LISTING

Ethyl Methacrylate, Neopentyl Glycol Dimethacrylate, Acetoacetoxyethoxy Methacrylate, Trifluoroethyl Methacrylate, Hydroxyethyl Methyltolylamine, Isostearyl Isononanoate, Drometrizole, CI 60725 (Violet 2).

AVAILABLE SIZES

- Professional: 236 mL (8 fl oz)
3785 mL (Gallon)
