

# BRISA™ Gel Enhancements Removal

1 HOUR

Proper removal of gel enhancements is vital to the long-term health of the client's natural nails. **BRISA™** Gel Enhancements are permanent enhancements and are not designed to be removed regularly. If there is a need for removal, take extra care not to damage the natural nail during the process.

## STEP 1:

### Cleanse Hands

1. Have the client wash their hands with soap and water and towel dry.

2. Massage **COOLBLUE™** Hand Cleanser into the client's hands to cleanse skin.

## STEP 2:

### Reduce the Enhancement

1. To safely remove **BRISA™** Gel, reduce the entire enhancement with a **Blizzard™ File**, leaving a **very thin layer** of product. Use caution and a soft touch, being careful not to file all the way to the natural nail.

## STEP 3:

### Apply Cotton and Foil

1. Apply cotton that has been **saturated** in **OFFLY FAST™ Moisturizing Remover** to each nail and **wrap entire fingertip** with foil. This will allow the product to warm to body temperature and speed up the removal process.

2. Allow **40 to 60 minutes** for the **OFFLY FAST™** to "swell" the molecular chains in the enhancement making the coating soft (like rubber). This process helps loosen the bond between the coating and the natural nail.

#### **STEP 4:**

## Remove Cotton and Foil

1. Remove the foil from the nails.

Remove the soft product with an orangewood stick and use the **240 grit of the Koala Buffer™** and buff the rest of the enhancement off; taking care not to file the natural nail. Complete the process with a **Girlfriend™ Buffer**.

2. Wash both your and your client's hands and condition the nails and skin with **SOLAROIL™** Nail & Cuticle Care.

3. Prescribe a home care program that will support the health and beauty of the nails. This is a great opportunity to up-sell the client into a regular natural nail care program, or alternative enhancement service.

Note: CND does not recommend the practice of regularly removing nail enhancements. Excessive removal can be drying to the skin and nails.

#### **PRODUCTS REQUIRED**

**COOLBLUE™** Hand Cleanser  
**CND™** Files and Buffers  
**OFFLY FAST™** Moisturizing Remover  
**SOLAROIL™** Nail & Cuticle Care

#### **ACCESSORIES/EQUIPMENT REQUIRED**

Hand towel  
Hand soap  
Cotton  
Foil  
Disposable towels  
Timer  
Orangewood stick
